

FOOD SERVICES MANAGEMENT

The food services program provided by the school district is designed to provide wholesome and appetizing meals to district students. School meals are important in contributing to good nutrition, which is vital to mental and physical growth during the formative years. As such, the food services program operates as an integral part of the total school program.

Program leadership, direction and supervision at all levels are the responsibilities of a trained staff. The superintendent, in cooperation with the director of food services, is charged with administering the total program, implementing Board policy as it pertains to school food services, and making recommendations pertaining to the program and food services personnel to the Board. Food services personnel in the schools will be directly responsible to the director of food services in the district and the building principal.

The superintendent or designee shall administer the program in the particular school, and shall maintain discipline in the cafeteria or lunchroom.

The school food services program is designed to be financially self-supporting. It will operate on a non-profit basis and comply with all rules and regulations pertaining to health, sanitation, internal accounting procedures and service of foods. Schools will meet all state and federal requirements necessary for participation in state and federal lunch programs. School food services receipts will be used only to pay regular food services operating costs.

Meal prices shall be established annually by the Board of Education.

When food services facilities are used by outside agencies, an adequate fee approved by the Board will be charged. If facilities are used for other than the regular program, the manager will ensure that no supplies provided for the regular program or USDA commodities are used.
