Engineering Summer Camp

July 15-20 & 22-27, 2012

Mizzou Engineering's Summer Camps demonstrate the variety of things that engineers do and the tools of their trades to high school sophomores, juniors and seniors. Mornings are dedicated to learning about MU's engineering disciplines from leaders in their fields. Afternoons offer practical experience in labs and through industry visits, and evenings are spent testing student skills in friendly competitions. Besides trying their hands at solving engineering challenges, campers will experience life as college students, make new friends and have fun along the way.
